

### SAVAGE'S TOMAHAWK OUT FOR COUNTY SALARIES

LOBBYISTS SECRETLY WORKING AGAINST HIS BILL

Reapportionment of Senatorial and Assembly Districts Would Give the Democrats no Show—Melick also Suffers—Night Session to Begin

(CORRESPONDENCE OF THE TIMES) SACRAMENTO, Feb. 14.—In spite of the fact that all of the present county officers of Los Angeles were elected two years ago on a platform which provided for a reduction of their salaries, the bill introduced by Senator Savage, which would increase the salaries of all county officers, is being secretly opposed by the Democrats in the Senate. The bill, which would increase the salaries of all county officers, is being secretly opposed by the Democrats in the Senate. The bill, which would increase the salaries of all county officers, is being secretly opposed by the Democrats in the Senate.

### At the Churches Yesterday

Bishop Selver

BISHOP WALTER A. SELVER of the Free Methodist Church delivered two strong sermons at the local church, corner of Sixth and Crocker streets, yesterday. In the evening the edifice was packed to the doors, when the bishop's exhaustive treatment of "Salvation" held the close attention of the congregation for over an hour.

**AT NEW YORK HOTELS.**

NEW YORK, Feb. 17.—[Exclusive Dispatch.] L. J. Merritt of Pasadena is at the Astor

with the Rocky mountains. That is not the fashionable view, but he holds to it.

This love of nature it probably is that has led him to the creation of this splendid settlement in the Adirondacks known as Nebaness Park. It comprises 112,000 acres of mountain, forest,

goddies and cute little punk sticks upon tables. The incense fires were lighted last evening, and some of the more gay Chinamen made a start upon the fireworks. From early evening firecrackers popped and spluttered. There were many white visitors at the place

the Chickering

## RAILS OVER THE BORDER.

Arizona's Line into Old Mexico Moves.

Extension to El Paso Seems Likely.

Unique Traction Engines Haul Freight—Progress of the Mines.

**RISBER (Ariz.) Feb. 18.**—(Regular Correspondence.) The new railroad into Mexico has crossed the border line with its rails at the new town of Douglas, about twenty-five miles southeast of this point, and work is pushed toward Naco. The driving of the last spike on American soil was made something of a ceremonial, attended by a party of mine and railroad officials from Bisbee. As far as the line the railroad now is known as the Southwestern of Arizona. It is capitalized for \$250,000, the stock being distributed among the Copper Queen's main employees in Bisbee. The grading contractors, Robinson & Tooley, have about 1000 men at work on the construction of the line southward. Grading camps have been established as far as Fronton. The new town of Douglas has been established as a station. With it has been consolidated the town of Overlook. Branch outcrops have been established by the Mexican and American governments and a hotel is to be built at once.

There seems no doubt that the eastern extension of the Southwestern will be to El Paso, where depot and warehouse grounds have been secured. Thus the Bisbee and Naco freight of the Phelps Dodge mining companies will be given the advantage of competition among the trunk-line railroads. It is understood here that the 16-mile line between Douglas and El Paso will be filled in as soon as the Naco line is complete. At present the railroad connecting this point with the Southern Pacific at Benson is doing a rushing business. At many a load of freight are occasionally in the Benson railroad yards, consigned to the line of Douglas.

**UNIQUE FREIGHT TRAINS.**

It has been reported that a contract has been let for the use of the new railroad from Naco to the Cananea mines, a distance of forty-five miles. The railroad is to be completed, the Cananea freight will be handled by traction engines of unique design. The first of the road engines has just arrived from Ohio. It will haul a train of three cars, each with a capacity for a carload of bullion or coke. At present 100 horses and mules are required for hauling the Cananea freight from Naco. The working of the mines is hampered by the transportation question, mule teams furnishing a very unsatisfactory mode of transport from many of the mines to the furnace. This trouble will be rectified when the new line is completed.

The new line will connect the smelter with all the company's ore bodies. The smelter is situated on a hill of copper matte, which costs \$8 a ton to get to the railroad. A curious element some time ago was of the copper matte, that had been smelted out by the Spaniards many years ago, when the mine was worked for silver and silver, and when the copper was allowed to go to waste. It is reported that in one of the prospect shafts of the company has just been found a magnificent deposit of native copper. The water question has been solved by the discovery of a seemingly inexhaustible supply in a 200-foot shaft, and the mine will be able to operate. The mine will probably be abandoned. Encouraged by the success of the Cananea company, several other companies, notably the Democrats and the Mina Mexicana, are instituting reduction works in the same district. Senator Clark is also developing mines near by.

**OTHER MINE NEWS.**

Nothing very definite has been told of the plans for the unwatering and working of the old Tombstone mines, though a company has been formed by C. D. Arms and other capitalists for the purpose. Superintendent A. L. Grow was called to San Francisco lately for a conference with the representatives of the mine. If something is not done very soon the magnificent water-power system of the Tombstone will be transferred to Bisbee. The source of supply is in the Huachuca Mountains, more than twenty miles distant, and across the broad San Pedro Valley. A line to Bisbee would not be as long as the present one into San Francisco.

The new eight-stamp mill of the Commonwealth mine at Pearce is running steadily, and the output is good. The mine is owned by Senator Fenimore of Pennsylvania and associates, to whom it is bringing an income, approaching \$100,000 a month. Practically all the output is sold. About 100 men are employed on the property.

A sixty-ton water-jacket furnace is being erected on the Copper Belle mine at Green in Turquoise district.

The new Mitchell furnace in the works of the Copper Queen Company at Bisbee, has been "blown in," and has proved a success. Through it the capacity of the works has been increased to fully 1200 tons of ore per day, giving the smelter the largest capacity of any in the Southwest. Much of the ore for the smelter is coming now from the new Spray shaft, the most remote of the larger workings of the Copper Queen Company. The Spray shaft, just completed, is one of the best in the West, and has capacity for lifting 100 tons of ore a day. On the 720-foot level at the Spray has been struck a magnificent body of sulphide ore. The head of the shaft is connected directly with the smelter at Bisbee by a branch of the Grand Reef mine. Burgess & Thiele have struck a six-foot vein, carrying 10 percent copper and 21 ounces of silver to the ton.

**ARIZONA BRIEVITIES.**

Though the population of Bisbee is estimated at 7000, the city is not incorporated, nor does there appear to be any desire to assume civic honors. The ordinary precinct constabulary, working under two justices of the peace, maintain order. This is not difficult, though nearly 2000 men are employed at the best wages in the vicinity. One company alone disburses over \$100,000 a month in wages. There is a heavy tax incumbent upon the County Board of Supervisors to propose the numbering of the houses of Bisbee, a plan whereby it is hoped to avoid much confusion that has been known in the past.

Through the efforts of J. G. Pritch-

ard, Bisbee will have a new church edifice, to house the Presbyterian congregation.

Cochise county has been experiencing the heaviest snowfall known for years. Several cases of smallpox have appeared in the Naco area. The sufferer being M. S. Kittle, a laborer lately from El Paso. In all cases the patients have been isolated and no general epidemic is feared.

A few days ago, through the premature discharge of a blast on the grade of the Naco area, a Mexican laborer was killed. The sufferer was a Mexican laborer, a Mexican official held them responsible for the death of their comrade. The mere hint was enough. The three secured money and got away from the grading camp a little while before the arrival of the Mexican police. By hard riding the border was reached in safety.

At the Cananea camp, on the last day, several Indians created disturbance that has been magnified into a rebellion. The truth is that the peace disturbers were soon gathered into the calabozo.

At Naco, the border town south of Bisbee, there are twenty places on the southern side of the line and five on the northern. It is not unusual therefor that trouble is to be ways on tap. The latest episode had for its principal actor a young man named McGuire, who was shot across the line to get an overcoat that had been stolen from him in Jerome several months ago before a Mexican official recognized him in Naco. The lad, entering a back room of a saloon, was set upon by several of them. McGuire succeeded in getting across the international line, but the son was captured and shot in the back. McGuire's father then came on one afternoon with a party of men, and Miramontes was again the recipient of attention, receiving a number of blows before he was taken to the hospital. McGuire's father, Edwin Nolan, 7 years old, fell between the rails in the small yard of the railway at Bisbee and was mangled to death under the wheels. McGuire's father, Edwin Nolan, 15 years old, son of Martin Costello of Tombstone, accidentally shot himself while on a hunt for a pair of fairbanks, dying almost instantly.

**TWO PASSENGERS SEVERELY INJURED.**

**STREET CAR CRASH AT THE FIRST STREET VIADUCT.**

Mrs. Buell Jumped from One of the Cars and is at Good Samaritan Hospital in Critical Condition—C. A. Jensen Also Hurt.

Mrs. Emma Buell, a tourist of Fullerton, is in a critical condition at the Hospital of the Good Samaritan, as the result of a blow received when she jumped from a street car yesterday afternoon at the first street viaduct. The car was crowded, and she was thrown into a collision with the car below. C. A. Jensen, a dairyman, was also hurt by jumping from the car, and was thrown into a collision with the car below. The trouble occurred at the west end of the first street viaduct at 5 o'clock in the afternoon.

Car No. 195 had just crossed the viaduct, and was moving west along the incline at the west end. When Motorman Palmer attempted to apply the air brake on the rear car, it failed to work, and the car slid down the hill at a rapid rate. The propelling apparatus was broken in an endeavor to reverse the current, and then the car was stopped. Palmer and his conductor, C. B. Blackman, changed their belts to warn the car ahead to get out of the way.

Mrs. Buell sat on one of the rear outside seats of the forward car, while Jensen sat on the opposite side of the car facing the east-bound track. Both cars were crowded, and the passengers were frightened. Jensen cried: "Jump for God's sake jump, or you will be killed." During her stay here she resided at the Rowland Hotel, and she was not severely injured, and after being treated at the Receiving Hospital, went to her room at Fifth and Main streets.

Both cars were moving rapidly when the rear one collided with the forward one, and the result was a collision. The car struck on the back of her head, sustaining a blow which made her unconscious, and laid open the scalp for more than an inch. She was carried into the Receiving Hospital, where a patrol wagon removed Jensen to the Receiving Hospital.

Dr. John H. McIlwain was passing the place at the time, and he treated the injured woman, who was later taken to the Good Samaritan Hospital in the patrol wagon.

Dr. Coderus said last evening that the woman was in a very critical condition, and might die from the shock. She is 42 years old, and has been in Los Angeles for some time. During her stay here she resided at the Rowland Hotel, and she was not severely injured, and after being treated at the Receiving Hospital, went to her room at Fifth and Main streets.

## DRILLING NORTHWEST.

Active Operations in Local Extensions.

The Petroleum Market's Problems.

Big Sepe Canyon Soon to Be Opened—Progress in Many Fields.

The past week has been lively in the northwestern extension, and incidentally a record week for new operations. All along the line new derricks have thrust their skeletons above the drill.

Just west of the Baptist College, the Davies Oil Company has commenced drilling of a new well, which gives promise of even better production. The hole is 375 feet deep, and in it are from forty-five to fifty-five feet of oil.

On adjoining land, the Mayfield Oil Company is making arrangements to drill a new well.

On the Weyne lease, Adams Brothers made a record for quick drilling. The company has eight wells completed, seven of which were put down in two days, and the eighth in three days.

Adjoining the Loma Vista Oil Company's property, Goldsmith Brothers have a well down 600 feet, but no oil has yet been struck.

On the corner of Temple and Western avenues, Lowe and Williams have just completed a ten-barrel well, which gives promise of even better production. The hole is 375 feet deep, and in it are from forty-five to fifty-five feet of oil.

On the Weyne lease, Adams Brothers made a record for quick drilling. The company has eight wells completed, seven of which were put down in two days, and the eighth in three days.

truth of the statement of the Santa Paula Chronicle in reference to the oil field of that name. The Chronicle says: "The oil field of Santa Paula is now not only one of the biggest in Ventura county, but also one of the most active proven oil districts in the State."

Within the past few weeks no less than fifteen companies have secured holdings, and all have entered the field with the intention of developing oil.

Well No. 2 of the Whidden and Double Oil Company has its third well on the pump and it is reported to be producing oil at the rate of thirty barrels a day. Well No. 4 is going down at a good rate of speed.

The Santa Paula Home Company is working day and night. Two seepages of oil have been found, but have been closed off.

In Lyon Canyon, the Old Oil Company has demonstrated that the part of the valley where its operations are being carried on is a rich one. Its first well is now in a good position to produce oil at least fifty barrels of oil. The production is a lighter gravity than the average oil of that field.

**RAN DIEGO'S PROSPECTORS.**

The Monarch company will resume work Tuesday, as it is expected that the well will be ready to produce oil by that time. The company also has been working on the other well, but the work was closed down before the rains, the drill had been sent in 1188 feet and had reached the oil.

At Encinitas two companies will be at work this week. The San Diego County Oil Company is working on the well, and the Victoria company has everything in shape to rush the search.

**HERE AND THERE.**

On section 10, the Electric Oil Company has a derrick up and will commence drilling the first of the present week. The company also has been working on the other well, but the work was closed down before the rains, the drill had been sent in 1188 feet and had reached the oil.

The Bolina Oil Company on section 20, 21, 22, has been working on the well, and the Victoria company has everything in shape to rush the search.

Near the town limits of McKittick the Twenty Oil Company has commenced drilling of a new well, which gives promise of even better production. The hole is 375 feet deep, and in it are from forty-five to fifty-five feet of oil.

The Pittsburgh Oil Company expects to have little trouble in sending the well to the surface.

In the McKittick field the Vancouver Oil Company's recent find adds considerably to the production.

If the oil belt extends northward along the hills on the east side of the McKittick field, the search for oil will be discovered before many months pass by. The Porterville folks are preparing to put the well to the test.

The latter company is backed by Delano capital, and will soon be ready to push the field, having secured a large amount of capital.

Others who shortly invade that locality, will use the work of thoroughly that country.

The company at Newport Beach, boring for asphaltum, has just struck oil. The well is now being worked.

## A Nerve Build Southern PASADENA.

Health is not a question of muscle and strength, but of nerve force that gives to the strength and vigor to withstand the buffeting of life and resist the encroachments of disease.

Weak nerves, nervousness, indigestion, loss of sleep, anxiety and nervous powers; when the restless twitches of the throbbing of the heart, the irritability of tongue and vision of spirits proclaim the approach of nervous prostration.

Dr. Miles' Nervine is a powerful nerve tonic, and a most reliable strength fortified before health and vigor can be restored.

"For several years I was troubled with nervous prostration, and was unable to do any work. I tried many remedies, but nothing helped me. I then tried Dr. Miles' Nervine, and in a few days I was able to do my work. I am now in perfect health, and I am a great believer in Dr. Miles' Nervine."

**Dr. Miles' Nervine**

It is a preventive and a cure for nervous prostration, indigestion, loss of sleep, anxiety and nervous powers.

**WHITTIER WRETCH SETS STORE AFIRE.**  
In one way and another, until the last moment when by some pretext they will fail to take the desired action. This will result in bringing out a large crowd at the City Hall Monday evening, when the Trustees will be asked to show their hand. The resolution presented only asks that the people be given an opportunity to vote upon this question.

**COAL OIL SPRINKLED ALL OVER MUSIC ESTABLISHMENT.**  
New Block Abused and Saved by a Mere Chance—The Firebug Made a Blunder in Not Leaving a Window Open.

**WHITTIER, Feb. 17.—[Regular Correspondence.]** One of the most undesirable elements of the population in the history of Los Angeles county was made here shortly after midnight. The preliminary work, and there was considerable of it, may have been done at any time after 10 o'clock at night, but it was after 2 o'clock when the fire was discovered. About 2:15 James Sugars, while talking with two young men in their room on the second floor of the Ramona Hotel, on the corner of Philadelphia street and Comstock avenue, heard a crash of broken glass, and looking out of the window, saw that the interior of the Pitzer Music Company's store on the opposite side of the avenue, was ablaze. He gave the alarm, a crowd of men gathered, and it was some time before the fire was extinguished. The fire was a very serious one, and it was some time before the fire was extinguished.

**SANTA ANA BREVIETTES.**  
M. M. Crookshank has begun the erection of a fine residence on North Freng street. The house is a two-story affair, and it is a very fine one.

**PEACE OFFICERS ENGAGE IN WAR.**  
BLOODY THREE-CORNERED BATTLE ON VENTURA STREET.

**VENTURA, Feb. 17.—[Regular Correspondence.]** There was a bloody battle on Main street last night between three peace officers. Deputy Constable Henry Arrellanes, with the aid of his heavy guard, laid Constable Russell on the ground. Deputy Sheriff Frank Esperance also attacked Russell, but he was not so successful.
